KEY FEATURES OF HILARY'S BLEND RENAL (that differentiate it from HILARY'S BLEND original supplement):

Hilary's Renal Blend
Supplement for renal recipes

**FOR
DOGS & CATS
WITH RENAL
DISEASE**

Contains No Added Phosphorus

(allows for greater flexibility in formulating renal recipes)

Contains Methionine and Tryptophan

(amino acids most likely to be limiting in protein-restricted diets)

Contains Taurine, Biotin and Vitamin K

(essential nutrients for cats, beneficial for dogs)

Vitamin Levels Adjusted for Renal Patients

(increased B-vitamins, increased vitamin E, K and C)

Contains Potassium Citrate

(to help prevent metabolic acidosis)

pharmaceutical grade (fit for human consumption). All vitamins and minerals are in purified non-allergenic format and are tested for purity and potency before being incorporated into the supplement.

Your veterinarian can select and photocopy the most appropriate recipes for your particular pet, based on your pet's stage of renal disease and any concurrent medical issues.
